PROFESSIONAL SUMMARY

A results-oriented Computer Science student with a strong foundation in full-stack development, blockchain technologies, and data analytics. Proficient in building efficient and scalable applications using the MERN stack, Python, and Java. Seeking to leverage technical skills and a passion for innovation to contribute to impactful projects at a reputed company.

EDUCATION

KIT's College of Engineering

B.Tech in Computer Science and Engineering; CGPA: 8.7

Kolhapur, India

Sep 2023 – Present

Government Polytechnic Kolhapur

Diploma in Information Technology; Percentage: 93.18%

Kolhapur, India

Dec 2020 – Aug 2023

INTERNSHIP EXPERIENCE

Mechsoft Digital Technologies Pvt. Ltd.

Software Development Intern

Pune, India

Jul 2025 – Present

- Contribute to the development of a comprehensive Library Management System (LMS) featuring item listings, rental queues, and automated user notifications.
- Develop a user-facing mobile application and an administrative panel using React and react native to manage rentals and monitor platform activity.

PROJECTS

DevSync | MERN stack, GenAI, Redis, WebSockets, WebContainers

Jan 2025 – Present

- Architected a full-stack collaboration platform using the MERN stack for developers to manage projects, add collaborators, and communicate in real-time.
- Integrated WebSockets via Socket.io to enable secure, real-time messaging within dedicated project-based chat rooms.
- Leveraged Google's Gemini 1.5 Flash API to create an AI assistant for generating and structuring project-specific code, executable directly via WebContainers.

Blockchain-Based E-Voting System | Solidity, Hardhat, React, Web3.js | [Live Demo](#)

Sept 2024 – May 2025

- Engineered a decentralized e-voting application (DApp) on the Ethereum blockchain, deploying secure smart contracts with Hardhat to ensure transparent and immutable election results.
- Utilized Web3.js to bridge the React front-end with Ethereum smart contracts, enabling seamless blockchain transactions and data retrieval.
- Integrated MetaMask for secure user authentication and on-chain transaction processing.

IoT Lab Automation System | Arduino, PHP, Embedded-C, MySQL

May 2023

- Constructed a sensor-driven automation system using Arduino and Embedded-C to intelligently control lab lighting and fans based on environmental conditions.
- Developed a PHP and MySQL back-end with a web-based dashboard for real-time data visualization and remote manual control of connected devices.

TECHNICAL SKILLS

Languages: Java, Python, C/C++, JavaScript, TypeScript, Solidity, Dart, HTML/CSS

Web Technologies: React.js, Node.js, Express.js, MongoDB, MySQL, PostgreSQL, Prisma ORM

Blockchain: Ethereum, Smart Contracts, Hardhat, Web3.js, Ethers.js

Developer Tools: Git, Linux, VS Code, Postman; **Mobile Development:** React Native, Flutter

ACHIEVEMENTS & COMPETITIVE PROGRAMMING

Coding Profiles: [LeetCode](#) (440+ Solved) | [GeeksforGeeks](#) (200+ Solved, College Rank: 10) | [GitHub](#)

Awards & Recognition:

- Winner at **KIT PBL Day, 2025** for the Stock Price Recommender project.
- 2nd Runner-up at **KIT PBL DAY, 2024** for the Blockchain-based E-Voting System.
- 2nd Runner-up in the Coding Competition at **PIONEER 2025**, organized by KIT.

CERTIFICATES

Cloud Computing (NPTEL), AI/ML Virtual Internship (Google)
